

roomieApp

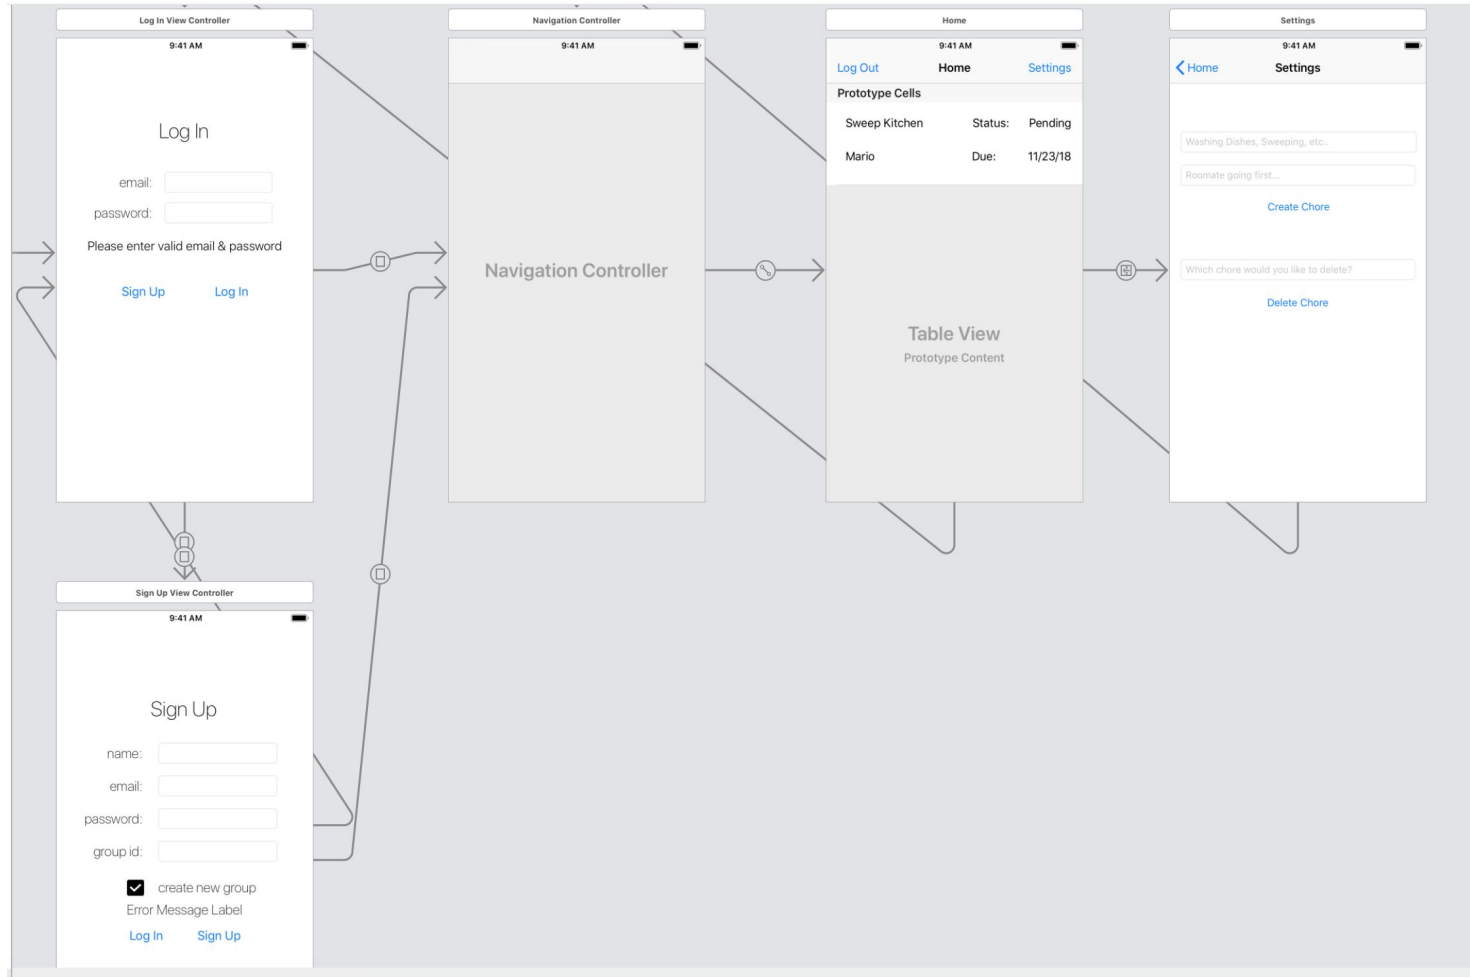

Joseantonio Maciel,
Allen Lozano, Kenia Rioja-Naranjo

Goal

Housing in Southern California is expensive so a popular option is getting roommates to split the cost of living. However it is hard to keep everyone accountable for doing their chores...so this app does it for you!

Initial Design

Future Scope

- Modifying PFUser to have more fields
- Creating PFOBJECT named Group to store all the user's with same group ID
- Automatic chore rotation based on selected frequency

Thank You
